DELTA CONTROLS A KEY PROVIDER OF BUILDING AUTOMATION SYSTEMS

For the

2008 BEIJING SUMMER OLYMPICS

Delta Controls provides a BACnet open protocol Building Automation System (BAS) for the Beijing Olympic Park Underground Commercial Centre (BOPUCC). Delta Controls is a global leader in providing BACnet open protocol BAS systems with the world's most comprehensive BACnet Testing Laboratories (BTL) listed product range. The Beijing Olympic Park Underground Commercial Center is located under the Olympic Lake the jewel of the Olympic Park, Beijing. This enormous 173,000 m2 Underground Commercial center is located in the heart of the Beijing Olympic Park. North from this hub to the "Olympic Nest", South East to the "Water Cube", East to the Olympic Sightseeing Avenue opposite the Olympic International Media Center and West to the Subway.

During the 2008 Summer Olympics, this commercial center is the Olympic Committee operations control center, security guard control center, and subway transit center for Olympic spectators. After the 2008 Summer Olympics the main usage will be Sport leisure activities, creative cultural functions and commercial retail business usage.

The BAS installation is being implemented in two stages the first a 2 month fast track installation begun in June 2008 and completed in time for the opening of the 2008 Summer Olympics. The BAS details for this stage are as follows:

OPERATOR INTERFACE	
OWS graphical workstation	
Web server	
Site Historian	
CENTRAL PLANT	AHU
9 Chillers	150 AHUs
9 Chilled water pumps	EXHAUST FAN
9 Condensing water pumps	330 Exhaust Fans
9 Cooling towers	DOMESTIC & WASTED WATER SYSTEMS
15 Hot water heat exchangers	150 Domestic water tanks
BACnet integration of Chillers	300 Wasted water pumps

Second stage implementation immediately following the 2008 Beijing Paralympics will include the final integration of miscellaneous building systems including lighting and 60 lifts. The final total of Input and Output (I/O) connections will be 7000 points plus 1000 integration points.

ABOUT DELTA CONTROLS

With thousands of successful projects throughout the world Delta Controls is an established leader in Building Management and Control. For over two decades Delta Controls has been raising the standard for building comfort control while reducing operating expenses in commercial, retail and government buildings, manufacturing, transportation, sports and other entertainment facilities, and schools, universities and hotels. Delta sets the standard for building comfort management while optimizing facilities performance and energy savings.

With product development, production and customer solutions under one roof at its corporate headquarters, Delta ensures the highest level of innovative design, product quality and service in the industry. Delta is 9001-2000 registered. Delta's quality management system includes all facets of the design and manufacture of its products and systems.

Delta selectively partners with quality, performance oriented Building Automation Solution Providers and System Integrators to be part of a global business development team. This team referred to as the Delta Partnership, consistently delivers unparalleled levels of controls expertise, operational training and customer service. The delivery of this performance has driven Delta's global success to date and will continue to be the most important factor fueling Delta's worldwide market penetration and expansion.

Exceeding customer expectations in the areas of technology, support and services is the foundation of the Delta Partnership today and in the years to come.

OUR VISION – Do it right

ABOUT DELTA CONTROLS BEIJING REPRESENTATIVE OFFICE

Delta Controls is building a reputation in China for delivering state-of-the-art, cost-effective, market-driven solutions that are easily managed by building maintenance personnel. These solutions generate energy efficiency and enhanced building performance to provide unsurpassed cost savings and comfort control. Delta is the BACnet leader in China with 15 Regional Centers of Excellence, providing local marketing, sales, engineering, installation, testing and commissioning support for more than 100 China partners. Delta has proven their expertise in project after project, more than 550 native BACnet projects installed in China since September of 2002. These projects include office towers, sports centers, hospitals, laboratories, shopping centers, museums, municipal, provincial and central government complexes, universities and more.

Delta Controls commitment to the China market has resulted in the following China industry recognition:

- 2007 China Intelligence Construction & City Information Summit - Top 10
- Qianjia Brand Lab - Top 10 from 2005 to 2007 three years
- Frost & Sullivan Report - Tier 1

"Delta Control's fully BACnet compliant systems offer true integration capabilities which were promised many times by many companies but delivered very seldom. Delta Controls has delivered true integration on many China projects" said Doug Chan, Managing Director of Asia Pacific Region, Delta Controls. He further said "We are dedicated to doing what is right for our customers and their buildings, which is why our customers feel they have done the right thing in choosing Delta Controls."

Delta Controls Beijing Representative office is staffed by a team of professionals with extensive industry experience. When coupled with Delta Control's superior Building Automation System; Delta Controls is the logical choice for any demanding construction or retrofit project.
