GxP Automation, LLC and Delta Controls Provide “Green” controls for NEXUS.....

When NEXUS, the Boston Green Building Resource Center, built their facility, they sought out a control system that would offer them the technology and flexibility required to demonstrate the many Green Building initiatives associated with environmental health and energy savings.

GxP Automation, LLC and Delta Controls teamed up to provide the solution they required. With the Delta Controls fully programmable native BACnet system, we are able to integrate the Aircuity environmental monitoring system and provide unique control from the main mechanical systems down to the room level. This control has both increased the environmental health of the building as well as maximizes energy savings. In addition, with the inherent tenant WEB portal, each tenant can monitor and control their space right from their own computer as well as be notified when to open or close the operable windows to maximize operational efficiency and minimize mechanical cooling or heating.

*"Our thanks go to GxP Automation for helping us pull this system together and with the technology of the Delta Controls product and Aircuity air quality monitoring technology, we created an HVAC system that maximizes human health while minimizing energy use. We encourage everyone to stop by NEXUS to see our system first hand."*

*.....Galen Nelson, Project Manager, NEXUS.*

NEXUS (pursuing LEED CI) includes over 6,000 square feet of product and educational showrooms, a print and online samples and resource library and networking space. The center is staffed by green building experts and LEED accredited professionals. It is open to building owners, architects, engineers, designers, developers and the general public.

GxP Automation, LLC, based in New England, is a global supplier of facility automation and regulatory compliance solutions to the Life Science industry. Together with Delta Controls building automation products, we provide our customers with the solutions they require and the value they deserve.....
